ZEUGNIS

We hereby confirm that Mr. Klaus Reithmeier worked 4 weeks in August 2007 as personal fitness trainer to members of the Saudi Arabian Royal Family at our Obesity Center Insula.

Members of the Saudi Arabian Royal Family attended several times with good success the multi-professional weight reduction program at our Insula Obesity Center. Through his professional approach, his extraordinary flexibility and motivation Mr. Reithmeier significantly contributed to achieve not only good results considering successful weight reduction but also a significant decrease of back pain in one patient (diagnosed as an intervertebral disk protrusion and treated contemporarily by an orthopedic surgeon).

We highly regard Mr. Reithmeier's work, his professional, respectful and dedicated approach to any special task, thank him for his support and look forward to cooperate with him in the next stay of the Royal Family in our Therapy-Center or in similar cases, whenever a personal fitness trainer is required.

Dr. med. Wolfgang Siegfried
Medical Director
